

ITALY DAY

ABSTRACT TABLE OF PROJECT PROPOSAL

PROJECT Nr. 13

SECTOR:	Nano science
PROJECT IDEA IN A HEADLINE:	Use of nanotechnology in space science and life science
INNOVATIVE POINTS:	Miniaturization and effective low cost set-up by the use of nanotechnology
POTENTIAL BUSINESSES AND APPLICATION FIELDS:	Early diagnostics of cells' disease in biology, Use of nanotechnology in aerospace science and its application in today's life
CHARACTERISTICS OF POTENTIAL PARTNERS:	Scientific structures and company interested in development and commercialization of these nano technologies set-up
EU PROGRAMMES TO PARTECIPATE:	Nano science
BRIEF PROJECT DESCRIPTION:	Use of local probe techniques in combination with optical microscopy for an early detection of cells' diseases. Development and commercialization of nano devices to be used in aerospace.
